

# What is palliAGED?

**palliAGED**  
PALLIATIVE CARE AGED CARE EVIDENCE

**palliAGED provides online access to evidence, tools, best practice guidance and resources about end of life and palliative care for older Australians.**

Produced by CareSearch, Flinders University and fully funded by the Australian Government, it is free to use and available online at [www.palliaged.com.au](http://www.palliaged.com.au).

## How was palliAGED developed?

palliAGED was developed by CareSearch in consultation with experts to identify the best available evidence and use this to provide practical guidance on best practice.

The content is based on consolidation, updating and revision of the Guidelines for a Palliative Approach in Residential Aged Care (APRAC) and the Guidelines for a Palliative Approach for Aged Care in the Community Setting (COMPAC) guidance documents.

## Who is palliAGED for?

Although primarily for health and aged care practitioners, resources are also available for community members seeking information about end of life issues.

## What it includes

palliAGED has both a Practice Centre and a complementary Evidence Centre. In the Practice Centre you will find useful resources including Practice Tip Sheets for careworkers and nurses new to palliative care. You can also find practical guidance for more experienced providers of care, including mobile Apps for GPs and nurses to use at the point of care.
